

b **Five failures, in the order found**

1. **No capacity**
   retry
2. **Job status never read**
   the HTTP proxy refuses the default Python user agent
3. **Pod set-up broken**
   a system package
4. **Running pods deleted**
   another session on the account; per-team pod names
5. **Job orphaned**
   the session restarted; collect takes it over

c **Measured on the pilot**

83 min, 1.02 USD
full protocol: 5 seeds, 9 variants, RTX PRO 4500

35–60 s vs 15 min
one training: GPU vs one CPU core

4–5 ms per step
solver at 64^3 on the GPU
