a Un pas de temps

$$\partial_t \mathbf{u} = \mathbf{u} \times \boldsymbol{\omega} + \mathbf{j} \times \mathbf{B} - \nabla\Pi + \nu\nabla^2\mathbf{u} + \mathbf{f} \qquad \partial_t \mathbf{B} = \nabla \times (\mathbf{u} \times \mathbf{B}) + \eta\nabla^2\mathbf{B}$$

b Une simulation dans le temps

c Ce qui est écrit
